

Shape WA's new Carers Strategy

Have your say during the statewide public consultation process

Join us at the **Bridgeley Community Centre in Northam on Friday 8 May 2026.**

The State Government is calling for Western Australian carers to have their say to help guide the development of the new Western Australia Carers Strategy.

Carers give unpaid care to a family member or friend who needs assistance with everyday tasks due to either disability, impairment, mental illness, an age-related condition, or living with a chronic health condition.

The new WA Carers Strategy will set the long-term vision for how government, community and service providers can work together to better support WA's carers.

The feedback from the statewide consultations will help ensure the future WA Carers Strategy reflects the diverse voices and needs of carers, including those in regional and remote communities, Aboriginal and Torres Strait Islander carers, and young carers.

Western Australian carers, people with a carer, carer-involving organisations and those connected to carers are invited to participate.
